MOHAMAD KAIFODDIN

AI/ML Engineer | Python & Scikit-learn | Data Pipelines & Model Deployment
Hyderabad, Telangana, India | +91-7057547014 | shaikhkaif7014@gmail.com | LinkedIn | GitHub

PROFESSIONAL SUMMARY

AI/ML Engineer with 1+ year of hands-on experience building, training, and deploying machine learning models using Python and scikit-learn. Skilled in data preprocessing, feature engineering, and SQL/MongoDB data handling, with practical experience connecting ML models to backend systems through REST APIs. Currently driving end-to-end ML workflows spanning model experimentation, API deployment, and production support, with a strong foundation in NLP basics and scalable ML pipelines.

TECHNICAL SKILLS

Machine Learning: Python, Scikit-learn, Pandas, NumPy, NLP (Basics), Transformers (Beginner)
Databases: SQL, MySQL, MongoDB
Backend: REST APIs, Spring Boot, FastAPI (Learning)
Tools: Git, Linux, Postman, JIRA
Cloud & DevOps: AWS (Basics), Docker (Basic), ML Deployment (Basic)
Programming Languages: Python, Java, C, C++, JavaScript

WORK EXPERIENCE

ML Engineer — Artmac Soft Pvt Ltd | *April 2025 – Present*

- Developed and trained 10+ machine learning models using Python and scikit-learn across multiple structured datasets for classification and prediction tasks.
- Engineered data preprocessing pipelines handling missing values, categorical encoding, and feature scaling across datasets of 10,000+ records.
- Extracted and managed training datasets using SQL and MongoDB, streamlining data preparation time by an estimated 30%.
- Tuned model hyperparameters systematically, improving evaluation accuracy by approximately 8-10% across iterations.
- Integrated 3+ trained ML models into backend services through REST API endpoints, enabling real-time prediction access.
- Maintained version control with Git across all project branches and worked within Linux environments for development and testing.

PROJECTS

Customer Churn Prediction | *Python, Scikit-learn | May 2025 – June 2025*

- Constructed an end-to-end supervised ML pipeline processing 5,000+ customer records, covering data cleaning, missing value handling, feature encoding, and train-test splitting.
- Trained and evaluated a Logistic Regression model, achieving approximately 80% classification accuracy on customer churn behavior.
- Validated the model against a real-world business use case, demonstrating practical proficiency in preprocessing, training, and evaluation workflows.

Resume Screening & Text Classification (NLP) | *Python, TF-IDF, NLP | June 2025 – July 2025*

- Designed an NLP-based text classification system to automatically categorize 200+ resumes by job relevance.
- Implemented text preprocessing including tokenization, stop-word removal, and TF-IDF vectorization to structure unstructured resume data.
- Trained and compared multiple ML classification models, improving categorization accuracy and strengthening applied NLP and feature extraction skills.

EDUCATION

MCA (Master of Computer Applications) | *2026 – Pursuing*

Bachelor of Computer Science — College of Computer Science and Information Technology | *June 2021 – Dec 2024*

HSC — Shivaji MahaVidyalaya | *June 2020 – Feb 2021*

SSC — Shri Mukundraj Vidyalaya | *June 2018 – March 2019*

ACHIEVEMENTS & CERTIFICATIONS

- Field Technician – Computing & Peripherals (ELE/Q4601), NSQF Level 4 — Certified by ESSCI under the National Skill Development Corporation; trained in computer hardware fundamentals, system installations, troubleshooting, and peripheral maintenance. Certified 09 July 2023.
